## Online Reservations Integrated to Mainstay

JPi have been asked by a number of hotels who use the Mainstay property management system (PMS) to produce a fully integrated, real-time online reservations solution.

As a fellow user of Mainstay PMS we thought you may be interested in hearing more about the developments and how you can also benefit.

Working closely with K Computer, JPi are producing a solution which allows live reservations to be made via your website which will include the following features for each property:

- Live, real-time reservations straight into your Mainstay PMS
- Your booking pages fully integrated into your website
- No risk of overbooking
- Full range of packages, breaks and rates can be made available online
- Administration area for management of reservations admin
- Commission free reservations made directly between your guests and you
- Maximise revenues by making the right rates and packages available when you choose
- Track special offers with promotional codes

JPi have been involved in producing e-commerce solutions and in particular hotel websites and online reservations solutions since 1997. We have successfully integrated to a number of hotel property management systems.

We have worked with some of the UK`s largest hotel chains as well as many independent properties. If you would like to work with us and K Computer to get your website up to date with online reservations then please do not hesitate to contact us for more information.
